

WRITING THE POST-GLOBAL IN LATIN AMERICA: COLLAPSE AND CONVIVIALITY

29-30 JUNE 2022 | 9H - 18H

Organization and concept:

Gesine Müller (Cologne) and **Jan Knobloch** (Cologne)

Latin American literatures in the 21st century are marked by the increasing exhaustion of the global project. The conference proposes to explore the plurality of this post-global experience by analyzing representations of collapse and conviviality in contemporary Latin American literature (2001–2021). The two concepts exist in a productive tension: while representations of collapse emphasize the vulnerability of natural and social systems, conviviality is directed towards the possibility of living together in difference.

Literature, quite unlike any other medium, is perfectly suited to sketching out and enacting scenarios of such tension under fictional conditions. Literary fictions can imagine new ways of living together – and thereby contribute to solving problems related to convivialities of the future – if we treat fiction as a heuristic form, the basis of a “sociología fantástica” (Marcelo Cohen) that expands the possibilities of the thinkable. Collapse is the moment when conviviality is revealed to be fragile and endangered. At the same time, however, it also opens up a post-catastrophic future in which social reconfigurations and new models are possible.
